EXPERIENCED | POWERFUL | SOLUTION ORIENTED
Your partner for industrial opto sensors.

ABOUT US

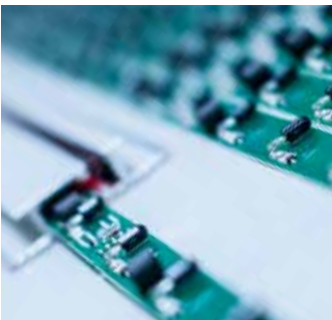

For more than 25 years, DUOmetric has been offering highly successful measuring and process control technology. Our focus is on customer oriented development and

manufacturing of high quality light grids and controllers.

**DEVELOPMENT, MANUFACTURING,
SALES AND ADMINISTRATION -
ALL UNDER ONE ROOF!**

DUOmetric light grid systems stand out due to their flexible and modular system design. Versatile transmitter and receiver profiles offer wide variations in beam spacing, monitoring height and many other optional parameters. Depending on the application requirements, the light grids are combined with internal or external controllers. The different product lines have standard equipment features and offer expansion and customization options to meet specific application demands.

INDUSTRIES

We work in close cooperation with our customers and consider the demanding requirements of various industries to provide flexible solutions for your applications.

PLANT ENGINEERING & CONSTRUCTION

DUOmetric industrial light grids are efficient control devices for factory-logistics and process-automation.

- » robotics
- » logistics
- » commissioning

MACHINE BUILDING / MANUFACTURING

DUOmetric industrial sensor solutions increase manufacturing productivity and quality.

- » process automation
- » access control
- » materials handling

ELEVATOR INDUSTRY

With our high quality light curtains we are a trusted, long-term partner of the leading elevator manufacturers.

- » door safeguarding
- » cabin roof monitoring
- » presence sensing

Our products offer key benefits.
Simple installation and set-up, long service life,
highest quality and many more.

ABOUT US

"We stand for a long-lasting, positive cooperation with our customers and distribution partners as well as first-class products with best price-performance ratio."
